RE: Hazardous Waste Compliance Inspection – November 15, 2010; Bushnell Outdoor Products, 22101 West 167th Street, Johnson County, Olathe, EPA Identification Number: KS0 000 509 463

Dear Mr. Richardson:

I received your email dated December 13, 2010, documenting the action taken to correct the violation cited on the Notice of Non-Compliance (NON-C) issued at the close of the referenced hazardous waste compliance inspection. Based on the information in your letter, the violation cited as a result of the inspection is considered corrected.

If Bushnell Outdoor Products is confident the monthly rate of generation information presented in your email is correct, Bushnell Outdoor Products is regulated as a Small Quantity Generator (SQG). As a SQG, Bushnell Outdoor Products must begin complying with Kansas Administrative Regulations (K.A.R.) 28-31-4(b) and 28-31-4(m).

To change Bushnell Outdoor Products hazardous waste generator classification from the previously identified Kansas Generator to Small Quantity Generator, please complete the enclosed Notification of Regulated Waste Activity form, in its entirety, and submit the original completed form to address shown at the bottom of page 13.

Your cooperation with the waste management program is appreciated. If you have any questions regarding the inspection or the above information, please call me at (620) 431-2390.

Sincerely,

Victoria S. O'Brien
